

Statement of verification

Capita plc
 Floor 1
 2 Kingdom Street
 Paddington
 London
 W2 6BD

17 February 2026

Scope

Capita plc engaged Carbon Footprint Ltd to verify its GHG inventory and supporting evidence for the period **1st January 2025 to 31st December 2025**. Capita is responsible for the information within the GHG inventory. The responsibility of Carbon Footprint Ltd is to provide a conclusion as to whether the statements made are in accordance with the GHG Protocol Corporate Standard.

Methodology

The verification was led by Georgina Whitlock, Senior Environmental Consultant, Carbon Footprint Ltd. Carbon Footprint Ltd completed the review in accordance with the '[ISO 14064 Part 3 \(2019\): Greenhouse Gases: Specification with guidance for the verification and validation of greenhouse gas statements](#)'. The work was undertaken to provide a limited level of assurance with respect to the GHG statements made. Carbon Footprint Ltd believes that the review of the assessment and associated evidence, coupled with this subsequent report, provides a reasonable and fair basis for our conclusion. The following data was within the scope of the verification (below shows the post-audit results):

	GHG emissions source	Tonnes CO ₂ e
Scope 1:	Natural gas consumption, vehicle fleet, refrigerants, other fuels	3,911
Scope 2:	Purchased electricity and district heating (location-based)	9,789
	Purchased electricity and district heating (market-based)	2,865
Scope 3:	Cat. 1. Purchased goods and services (including water)	115,045
	Cat. 2. Capital goods	10,029
	Cat. 4. Upstream transport	12,955
	Cat. 6. Business travel (air, rail, taxi, ferry, bus, employee mileage, hotel stays)	2,739
	Cat. 11 Downstream transport	22,871
Scopes 1,2 and 3 Total (location-based)		177,338
Scopes 1,2 and 3 Total (market-based)		170,414

Assurance opinion

Based on the results of our verification process, Carbon Footprint Ltd provides limited assurance of the GHG emissions statement, **and found no evidence that the GHG emissions statement:**

- is not materially correct and is not a fair representation of the GHG emissions data and information;
- has not been prepared in accordance with the GHG Protocol Corporate Standard.

It is our opinion that Capita has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of GHG emissions for the stated period and boundaries.
