A message from our Group Procurement Director

“We want to work with suppliers and supply chain partners who share our values and support us in delivering our purpose to create better outcomes”

We value the business relationships we have with our suppliers and seek to build lasting relationships, treating them fairly and paying promptly. We want to work with suppliers and supply chain partners that share our values and help us deliver our purpose, to create better outcomes. Our aim is to work together to achieve the highest standards in our supply chain, whilst achieving wider social, economic, and environmental benefits aligned to the Social Value Act.

This Charter sets out how we conduct business in an open, honest, and transparent manner, and what we expect of our suppliers.

We understand that, depending on the nature and scale of supply, different aspects of this Charter will be more relevant to some suppliers than others. This enables us to agree suitable targets with suppliers that are appropriate to their product or service offering.

As a minimum, we expect our suppliers to comply with all applicable laws and regulations. This includes the provision of safe working conditions, treating workers with dignity and respect, acting ethically and being environmentally responsible.

This Charter will evolve over time, reviewed with our suppliers, to reflect changing standards in society, the environment, and the digital economy.

We will endeavour to notify our suppliers of any breaches to this Charter, and it is a requirement that our suppliers do the same.

Suraj Naik
Group Procurement Director

Our Purpose

We have a clear purpose: we create better outcomes.

Our purpose is the reason we exist, beyond making profit. It helps motivate and inspire us all to go above and beyond for our clients, colleagues, suppliers and supply chain partners. Underpinning our purpose are a clear set of values and behaviours which define our culture as an organisation. We believe that acting according to these values and behaviours is the right way to do business responsibly for the long term and we expect all our suppliers to share these values.

Our Values

Our values are the guiding principles that drive behaviour, shape our culture, and steer our strategic direction.

Capita is committed to working with suppliers that reflect the Capita Values, working to innovate whilst putting our customers first, achieving success together and ensuring everyone is valued.

Our Responsible Business Strategy

Our responsible business strategy sets out our approach to addressing the most material issues that Capita should address as a modern outsourcer.

We want to work with our suppliers to tackle these issues together and create better outcomes for our people, our communities, our planet and our business.

We will continually review our supply base to ensure it delivers better outcomes for customers while addressing the need to reduce supply chain complexity, increase its resilience and improve service quality.
