**Emissions reduction targets**

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:  
 1.5C GHG reduction targets verified by SBTi  
 Net zero carbon by 2035

	Tonnes CO2e
We project that carbon emissions will decrease over the next five years by 28% against base year ahead of our 1.5C GHG science based targets to:-	267

Progress against our net zero target can be seen in the graph below:

**Carbon Reduction Projects**

Completed Carbon Reduction Initiatives Tonnes CO2e

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction achieved by these schemes equate to a 9% reduction against the 2019 baseline and the measures will be in effect when performing the contract which is:-

- Move to virtual meetings using Microsoft Teams
- Motion-sensitive low wattage lighting
- Heating ventilation and air conditioning (HVAC) efficiency upgrades
- Energy reduction program – switch off policy, what runs, runs when needed only.
- Reduce business mileage
- Where work circumstances allow, employees given options for flexible working model to reduce accommodation requirements

In the future we hope to implement further measures such as:

- Improve efficiencies in electricity consumption.
- Ongoing optimisation of building energy use and ensuring longer term strategies for building heating decarbonisation.
- Improve data and reporting to improve accuracy of carbon accounting.
- Reduce business travel emissions by greening our fleet and increase use of online meeting tools. Transport emissions will fall as cars, trains and planes produce less carbon.
- Engage with supply chain to ensure suppliers set science-based carbon reduction targets and commit to net zero. Monitor top supplier emissions annually
- Reduce commuting emissions

**Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>[1]</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>[2]</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Scope 3 emissions<sup>[3]</sup>. This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
