

# Clean Air Zones (CAZ)

An area where **action is being taken to improve air quality**.  
A zone where vehicles that don't comply with required emissions standards are fined for entering.

In London air pollution from traffic kills more than

**9,000**

people each year. The young, elderly and those with underlying health conditions are especially at risk.

We've helped to reduce nitrogen dioxide within the ULEZ boundary by

**44%**

Through ULEZ, Capita is ensuring that the level of harmful emissions from traffic will

**almost halve**

over the coming years

Toxic air makes poor health and chronic diseases worse. It can drastically

**shorten the lives of people**

living and working in our cities.

Clean Air Zones are

**crucial**

in reducing the amount of dangerously polluted city air and driving citizen compliance

Clean Air Zones have been introduced in

**Bath, Birmingham and Portsmouth**

**26 local authorities**

the Government has directed to reduce NO2 levels below legal limits since 2015

**Saving countless lives**

that could have been ruined or even cut short by toxic fumes. We're determined to make cities more attractive places to live and work. *Because everyone deserves to breathe clean air.*

Capita and Clean Air Zones provide Ultra Low Emission Zone (ULEZ) charging services in London for

**TfL**
