

Clean Air Zones (CAZ)

An area where **action is being taken to improve air quality**.
A zone where vehicles that don't comply with required emissions standards are fined for entering.

In London air pollution from traffic kills more than

9,000

people each year.

The young, elderly and those with underlying health conditions are especially at risk.

We've helped to reduce nitrogen dioxide within the ULEZ boundary by

44%

Toxic air makes poor health and chronic diseases worse. It can drastically

shorten
the lives of people living and working in our cities.

Clean Air Zones are

crucial

in reducing the amount of dangerously polluted city air and driving citizen compliance

Saving
countless lives

that could have been ruined or even cut short by toxic fumes. We're determined to make cities more attractive places to live and work. *Because everyone deserves to breathe clean air.*

Capita and Clean Air Zones provide Ultra Low Emission Zone (ULEZ) charging services in London for

TfL

Through ULEZ, Capita is ensuring that the level of harmful emissions from traffic will

almost halve over the coming years

Clean Air Zones have been introduced in

Bath, Birmingham and Portsmouth

26 local authorities

the Government has directed to reduce NO2 levels below legal limits since 2015
